

ECE 196 Team2Team Feedback:

First team:

This is what they said for your current Technical Progress : They have completed the pcb parts and figured out the software that that are using. They are still

This is your evaluation for ECE 196:

- Technical progress: 5
 - Reasoning : They had met all their goals and are on track to finishing their project soon. They seem to have a good outline of their expectations and everyone is doing their part
- Professional Progress: 5
 - Reasoning : They have been separating their work equally and was able to communicate properly if anyone was not able to do their part.
- Milestone Explanations and Detail: They had met all their goals and are on track to finishing their project soon. They seem to have a good outline of their expectations and everyone is doing their part
 - Reasoning : Extremely detailed milestones. Has due dates for all the miles stones and the person that will be completing it. Additionally, they are on time with their milestones.
- Visual Aids: 5
 - Reasoning : 5
- Website Clarity: 5
 - Reasoning : We scored them a 5 because it's clear to see every section of their project I.e the problem definition, proposed idea etc. Their website is also very concise and does not have a lot of words.
- Website Effort 5
 - Reasoning : We have them this score because it looks like they put a lot of effort into designing how their websites will look. One thing they can improve on is more images and making the website prettier in a sense.

This is what they said for the further constructive feedback box:

You are doing a very good kid at splitting the work equally and putting a lot of effort into the project. One thing you guys can improve on is to work more efficiently on the pcb board and putting the parts together

Second team:

This is what they said for your current Technical Progress : Tested every component successfully, PCB almost complete, currently working on the software

This is your evaluation for ECE 196:

- Technical progress: 4
 - Reasoning : They believed they made significant progress with their project and their milestones show that. The rest of it seems to be mainly the software end.
- Professional Progress: 3
 - Reasoning : A little bit of hesitation when I asked but they all ultimately agreed
- Milestone Explanations and Detail: They believed they made significant progress with their project and their milestones show that. The rest of it seems to be mainly the software end.

- Reasoning : Milestones are detailed and well thought out, however it doesn't specify any pivots or challenges or changes they might have experienced

- Visual Aids: 3

- Reasoning : 2

- Website Clarity: 3

- Reasoning : It's clear on what it is saying and what they are trying to achieve. The website could do with some polishing as its not fully updated yet. Some figures on the poster could also benefit by also being on the website.

- Website Effort 3

- Reasoning : Overall good website. They clearly refer and revise the milestones often. Some parts are not updated like the "project details" however.

This is what they said for the further constructive feedback box:

- Some pictures/diagrams on the poster could be placed on the website for further clarity

- Could benefit from filling out the "This is a Paragraph..." portions

- I'm unsure how the speaker is implemented, maybe elaborate on that more
